TALARIAX IS VERIFIED FOR CITRIX READY SECURE REMOTE ACCESS PROGRAM

- It is the first Singapore-headquartered company using an appliance-based solution for securing remote access using 2-factor authentication via SMS OTP and Soft Token

Singapore – April 6, 2017 – TalariaX, one of the leading industry players in enterprise mobile messaging solutions, today announced that it is the first locally headquartered company in Singapore to be verified as Citrix Ready under its Secure Remote Access program**. 'sendQuick ConeXa'**, its 2-factor authentication (2FA) solution has successfully completed the verification as part of the Citrix Ready Secure Remote Access program.

This program showcases partner products that integrate with Citrix products and add an extra layer of security to enhance secure remote access. The joint solution offerings benefit the customers by helping them secure their corporate network from data theft and other cybersecurity attacks.

"Today's digital economy has made companies and customers more vulnerable to cybersecurity attacks resulting in huge losses and damaging reputation of corporates, "said **Mr. JS Wong, CEO of TalariaX. "**Our sendQuick ConeXa combined with Citrix NetScaler provides reliable and seamless solutions which are easy to implement and ideal for remote user authorization and authentication."

The Citrix Ready program makes it easy for customers to identify complementary products and solutions that can enhance Citrix environments. Customers can be confident that sendQuick ConeXa has successfully passed a series of tests established by Citrix, and can be trusted to work effectively with Citrix NetScaler in order to provide enhanced security via 2FA Authentication and Authorisation.

With a sustained increase in cyberattacks, there is an urgent need for companies to secure remote access for their employees as well as customers. The sendQuick range of solutions is built to address critical IT business requirements to provide security and confidentiality of sensitive business data. sendQuick ConeXa is a 2FA solution that provides an extra layer of security while accessing sensitive data, especially when conducting financial transactions online. It has a built-in SMS One Time Password (OTP), Soft Token and Email OTP with Authentication and Authorisation (AA) capability, Radius Server and an SMS transmission engine, all in a single appliance. Furthermore, the ConeXa platform can easily integrate with an organisation's existing enterprise network management system giving complete control over its IT infrastructure.
