

## Your Private, Secure and Ready-to-Use Enterprise AI System

- Private deployment within your infrastructure and Cloud
- Air-gapped and offline capable
- Predictable enterprise licensing model
- Rapid deployment without complex setup requirements
- Enterprise API integration ready

## The Complete AI-in-a-Box System

### Ready to Deploy in Your Environment

AI adoption is accelerating across industries, but many organisations continue to face challenges when deploying AI securely and at scale. Traditional AI platforms often require compromises between innovation and control, creating concerns around **security, privacy, compliance requirements, and operational costs**.

Sensitive business information, internal knowledge, and confidential data should not be exposed to public AI platforms. At the same time, organisations operating in regulated industries require stronger governance over data processing, auditability, and data sovereignty.

**SendQuick AI** addresses these challenges by providing a secure, plug-and-play enterprise AI platform that runs entirely within your own environment. Designed to operate within your

organisation's infrastructure, **SendQuick AI** gives you complete control over data integrity, confidentiality, and sovereignty while enabling the power of Large Language Models (LLMs).

Whether you are building **intelligent virtual assistants, AI chatbots, internal knowledge systems, or workflow automation solutions**, **SendQuick AI** enables organisations to deploy enterprise AI quickly, securely, and with predictable operational costs.

**SendQuick AI** also supports flexible deployment options, including **on-premises, private cloud, and offline or air-gapped environments**, making it suitable for organisations with stringent security and compliance requirements. With seamless **API integration capabilities**, businesses can connect with existing enterprise applications, systems, and workflows to increase operational efficiency and productivity.

### AI Assistant Capabilities

**SendQuick AI-in-a-Box** allows organisations to build and train AI assistants using internal knowledge sources including PDFs, Word documents, CSV files, databases, websites and web crawlers, enabling accurate and context-aware responses based on your organisation's own data.

#### IT Support Assistant

Assist with troubleshooting, resolve common technical issues, provide system guidance, and accelerate incident response workflows.

#### Human Resources

Support employee onboarding, answer HR policy questions, employee benefits enquiries, and provide instant access to internal guidelines.

#### Operations

Help teams locate SOPs, process documentation, operational procedures, and work instructions instantly.

#### Legal & Compliance

Provide quick access to contracts, regulatory requirements, compliance documents, and policy information.

#### Finance

Answer enquiries related to expense claims, budgets, approval processes, and internal financial policies.

#### Customer Service

Provide faster access to product information, FAQs, troubleshooting guidance, and customer support resources.

## Why SendQuick AI?

### Private and Secure Deployment

Keep your sensitive information within your own environment without exposing data to public AI platforms or external services.

### Flexible Deployment Options

Deploy based on your business requirements through on-premises infrastructure, private cloud environments, or dedicated standalone systems.

### Your Choice of AI Models

Support multiple language models, providing flexibility and avoiding dependence on a single AI provider.

### Predictable Costs

No token-based pricing surprises. Infrastructure-based deployment gives better cost visibility.

### Seamless Integration

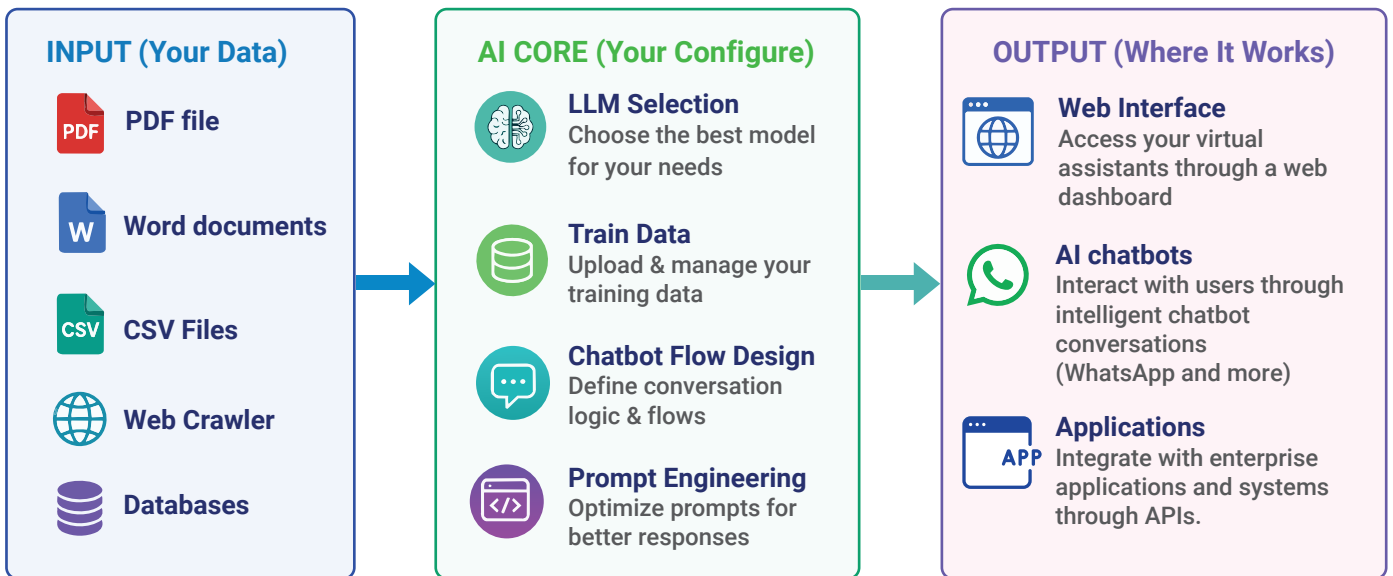

Connect easily with enterprise systems, applications, APIs, databases, and internal data sources.

### Air-Gap Capable

Support for Designed for highly secure environments with the ability to operate in offline or air-gapped networks.

## How it works?

## Built for Organisations that Require Complete Data Protection

For organisations where data confidentiality, regulatory compliance, and operational governance are critical, AI should remain fully under your control. **SendQuick AI** is designed for environments where protecting sensitive information is a business requirement, not an option.

Government Agencies

Healthcare and Pharmaceutical Organisations

Financial Institutions

Manufacturing and Critical Infrastructure Environments

Enterprises with Strict Security and Compliance Requirements
