SendQuick Conexa Simplifies Security with MFA - Digital ID Login, passwordless biometric authentication, FIDO2-capable YubiKey, One-Time Password (OTP) via SMS, Email, Soft Token and Push Authentication

SendQuick offers SendQuick Conexa, an affordable, simple and reliable solution that ensures secure remote access with strong Multi-Factor Authentication (MFA), allowing only authorized individuals to access sensitive data, applications and critical systems, from both onsite and remote locations.

SendQuick Conexa supports FIDO2, offering multiple authentication options like Digital ID login, passwordless biometric authentication and FIDO2-capable hardware security tokens e.g. Yubikey. Yubikey offers a modern FIDO-based phishing-resistant MFA solution, whereby users simply touch the YubiKey to verify to gain access.

This all-in-one SendQuick Conexa appliance also includes features such as built-in SMS OTP, Soft token (supports any standard SHA-256 soft token), Push Authentication to SendQuick mobile app, Email OTP with Authentication and Authorization (AA) capability, RADIUS server, SAML identity provider and an SMS transmission engine. SendQuick Conexa can support multiple SSL VPN sessions as required.
